Frontend NEWS

Angular 5

- Build optimizing
- universal support
- execute lambda functions
- rework internationalisation
- multiple selector names

React 16.2.0

- fragment support

```
render() {  
  return (  
    <>  
      <ChildA />  
      <ChildB />  
      <ChildC />  
    </>  
  );  
}
```

Firefox 57

- big performance

<https://www.heise.de/newsticker/meldung/heiseshow-Firefox-57-Ein-Quantum-Tröst-oder-echter-Neuanfang-3890555.html>

A promotional graphic for Firefox Quantum. It features two vertical bars representing performance benchmarks. The left bar for Firefox 52 shows a score of 32 'DURCHLÄUFE PRO MINUTE' (runs per minute). The right bar for Firefox Quantum shows a score of 66 'DURCHLÄUFE PRO MINUTE'. The text 'IST JETZT DOPPELT SO SCHNELL IM SPEEDOMETER 2.0 BENCHMARK' (Now twice as fast in the Speedometer 2.0 benchmark) is prominently displayed. The Firefox logo is shown at the top of each bar. The background is blue with decorative white lines and circles.

PHP 7.2.0RC6 Released »

09 Nov 2017

The PHP development team announces the immediate availability of PHP 7.2.0 RC6. This release is the sixth Release Candidate for 7.2.0. Barring any surprises, **we expect this to be the FINAL release candidate**, with Nov 30th's GA release being not-substantially different. All users of PHP are encouraged to test this version carefully, and report any bugs and incompatibilities in the [bug tracking system](#).

THIS IS A DEVELOPMENT PREVIEW - DO NOT USE IT IN PRODUCTION!

For more information on the new features and other changes, you can read the [NEWS](#) file, or the [UPGRADING](#) file for a complete list of upgrading notes. These files can also be found in the release archive.

For source downloads of PHP 7.2.0 Release Candidate 6 please visit the [download](#) page, Windows sources and binaries can be found at [windows.php.net/qa/](#).

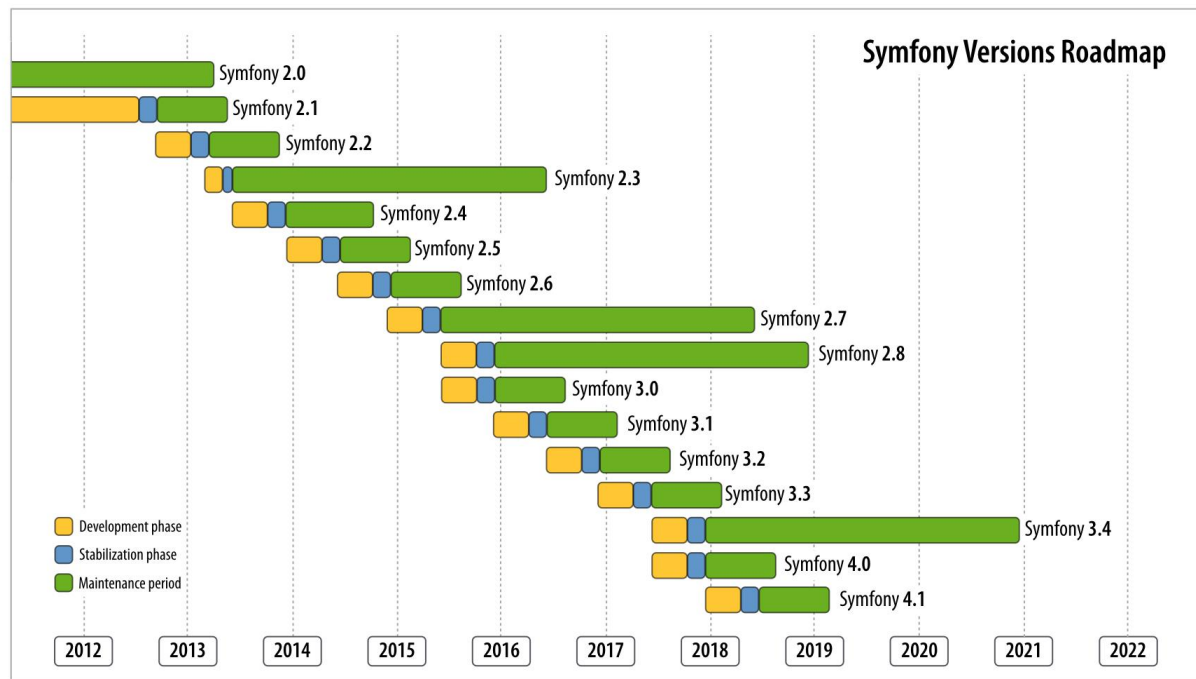

Thank you for helping us make PHP better.

Version 4.0 RC 2

Symfony 4 around the corner

- Application bundles gone
- Composer PlugIn: Symfony Flex
- Symfony recipes allow automation of package configuration
- From config to environment
- Micro by default
- Final release at Nov 30, 2017

Version 4.9

Wordpress

- Bugfixing after RC phase
- Improved Customizer workflow with scheduled theme changes, revisions, collaborative extensions, ...
- Coding enhancements
- Widget updates
- Site building improvements

Version 2017.3

PhpStorm

- New editor-based REST client
- Improved PHP language support
- Better exception inspection
- Testing improvement
- Twig templating and formatting enhancements
